The series is set in the year 2099, in a possible dystopian future of the Marvel Universe, and features Kenshiro Zero Cochrane, a pregnant killing but risen as rider of Ghost – his mind controls a powerful and well-armed robot. Similar to most of the 2099 Marvel titles, the protagonist was a futuristic version of a successful commercial character Marvel Universe. The series was heavily influenced by cyberpunk science fiction science. [summons needed] Ghost Story Rider 2099 was not one of the initial titles launched for the 2099 footprint and contained some direct cruise and other titles. The series ran for 25 issues, ending in May 1996. The title character's story concludes in the final issue, but Zero Cochrane was repaired as a prominent character in the final story of the 2099 single-shot 2099: Manifest Destiny. The fictional biography of Hacker Kenshiro Zero Cochrane was shot and faced to death in Transverse City after being hunted down for stealing information from the corporation D/Monix. As poison from a poison runs into his body, Zero has downloaded him to cyberspace, so block access to knowledge he stole from his enemies. [1] Cochrane's idea is discovered by artificial intelligence remains in a hidden section of cyberspace known as the Ghostworks. The Holy Spirit requires Zero to be the avatar of the real world, feeling his rebellious attitudes and rebel attitudes will make him the ideals coffee. Cochrane accepted and uploaded to a robotic Cybertek 101 body. Due to his similarity to the superhero in 20th-century, the robot becomes known as the rider. [1] The rider rider continues to avenge his own death and indeed against the plans of the corporation D/Monix, [volume & need volume] leading to a showdown with Zero's father, Harrison Cochrane. [volume & need volume] A faithful servant, Harrison indirectly (but intentionally) caused the death of his son. [volume & need volume] Zero eventually evolved to become whole from humanitarian communications networks.[2] foldable without solving [original research?] The series ends with artificial intelligence L-Cypher free and defeat. Although his enemies believe that he has been destroyed, L-Cypher has been downloaded to a stolen body and is planning his revenge. The Heartbreaker's origins never revealed. The ghost rider plays no part in the 2099 world series tomorrow, although the final stage of the final issue makes the show a discover the ruins that flooded into Transverse City, recovering what it apparently believes to be an inert Ghost Rider. However, the Holy Ghost itself pictures, however. [3] 2099: The World of Tomorrow was the final series Marvel 2099 and was canceled perhaps, leaving this plotline without resolve and unexplained. At least one issue in the series was published. [summons needed] The title of Daddy Dearest, was the question written by Scott Andrews and penciled by Max Douglas. After the 2099 line was canceled, there were no candidates in the entire matter ever being published. Scott put the latest black-and-white up on his website as part of his portfolios. [summons needed] Other versions of Zero Cochrane help the Wolverine through the modern age explore and travel to a new and different world in 2099 in order to gain knowledge in both time periods to keep them from merging in with each other. As part of this, Zero is confronted with battles Doctor Doom, Spider-Man, Cerebra and the Iron Patriots. [4] During secret events of War (2015), Zero Cochrane appeared in the Ghostly Racers mini-series. Power, Fitness, and Equipment Ghostly Rider 2099 is a Cybertek 101 robot. Reinforcing carbon-steel silicone robotic body parts gave Ghost Rider superhuman strength, stamina, and resistance. Both hands could transform, but the right hand of a graphite ceramic compound graphite black compound that exploded burst into energy; and the left hand of a polymimetic alloy, unable to cut onto a submolecular level. The robot also owns a flying system bearing Ghost Rider invisible detection by both electronic systems and the naked eye; Furthermore, he owns a solid gram system that would allow him to mimic the appearance of anyone (including Zero Cochrane), and create the illusion of himself being English in flames. The robot also has laser scanning and could be in self-repairing. During the series, the robot body needs to be changed on a relatively regular basis, especially after the power drainage operating its weapons system (in several stories this is used as a dramatic device, with the rider in rider triggering against a foot when its power supply is almost exhausted). However, in the final issue, this becomes less of a problem, as Zero finds a Mr. Merging portable power generator. The same scene explains that the Ghostwork scene had already blocked the Fent rider from thinking of the solution, as they didn't want to risk it becoming too independent. Zero is an expert computer hacker and cybersurfer, able to force its way both in and out of almost any system. As a digital psyche, Zero could navigate cyberspace, access information, and exist without food, water or other substances. Ghost Rider bats a modified version of the original Zero Cochrane's souped-up motorcycle.[1] a Ford Velociraptor 900 with thrusters and anti-gravity propulsion. Supporter Kylie Kylie Garin - Zero Cochrane's girlfriend. Willis Adams – A journalist working for Media. Jones Anesthesia – The owner of the Bar Code. Ghostworks are - initially used as a name for the hidden region of cyberspace where the creators of Ghost Rider's rider rider stay, later in the artificial intelligence series themselves are also referred to as the Ghost works. Dr Neon (Jimmy Alhazared) Harrison Cochrane Villains and antagonists Coda D/MONIX Dyson Kellerman Kebreaker Jeter Kabal Harrison Cochrane L-Sufficient Vengeance 2099 Warewolf In Other Media Video Games Ghost Rider 2099 appeared as an alternate suit of Movie Rider films in tie-in video games. Ghost Rider 2099 appeared as an alternate costume for Rider Ghostly in Ultimate Marvel vs Capcom 3. Ghost Rider 2099 appeared as a playable character at Marvel Avengers Academy, spoken by Nicholas Andrew Louie. The external link Daddy Dearest Ghost published the 2099 story Ghost Rider 2099 figures to 1994 and 1995 to the Chronicle Comic Retrieved from Shared Kenshiro Zero Cochrane was a hacker who ran with the Hotwire Martyrs, a gang based out of the transverse vilrawl. In mid 2099, the Martyrs were pulled from a trunkline fibreoptic and loaded a heavily-encrypted data archive of unknown origin. While trying to describe the record, the Martyrs were attacked by a gang known as the Artificial Kidz, who continued to murder most of the Martyrs and set off in pursuit of zero with the archives. With the poison from the round of darts he took while running at Kidz rapidly eating away his nervous system, Zero made a last effort—forcing them to screw them on by transferring the encrypted file to his girlfriend and then jacking directly into cyberspace in an attempt to burn implantation himself. Shortly after his white-hot limp limp, Zero woke to find himself in a surrealistic cyberscape populated by a group of rogue machine intelligence called the real Ghostworks. These ais believe that the current Humane Society (your typical Corporation Clean Everything cyberpunk dystopia) was heading for a total denounce. And, to have completely depended on the world's technological infrastructure to survive, they wanted to send zero back into the real world to serve as their agent of change. Appealing to his anarchist sensitivity, the Holy Ghost covered the whole deal as a chance for him to get back into the System with all those authority figures who seemed to make miserable lives for the little guy. Zero, of course, accepted – even though this was indeed in their own free will or due to the subtle modification Ais made of his personality it is unbalanced. Cars have hijacked an automatic factory and constructed a heavily modified variants of a Cybertek War 101, loaded with advanced nanotech weapons, self-repair, and camouflage capabilities, and downloaded their copies of Zero's personality to its neuro-net. Before hitting the streets, Zero used the robot's holographic ability to breathe itself-like itself into artificial blaze – a host of his fallen mates who also served to make him look very similar to the Fhost rider in the previous century. Appropriate enough, the first course of his actions was to seek vengeance against those responsible for the deaths. His demands eventually headed back to the D/Monix society (the legal owners of the archives) and his father, Harrison Cochrane. [1] During the course of his investigation of the missing file, Harrison realized that, as refreshing they used his own access code to intercept the data transmission, the only suspect might be his son, Kenshiro. Feeling more loyalty to the corporations than in his knife-waste son, it was a simple problem for Harrison to hire Artificial Kidz to dry out the Hotwire Martyrs and retrieve the archive. When they overcame this information from his father, Ghostly Rider was preparing to kill the old man, but he was distracted when he learned that D/Monix was now tortured his ex girlfriend, Kylie Garin, In an attempt to find out where he closed copy of the archive he sent to him before his death. They fought, but GR made it away with the chemical product in time. With the drug synthesis, she served as the willingness to go to Kylie's head to lead her out of her coma, which began a phantasmagorical journey through her psyche that gave insight into both Kylie's past and gave a few glimpses of what Zero was like when she was alive. Of course, she didn't care for the version of herself that she saw and, after Kylie was raised, Ghost Rider tried to convince her that Zero died and that it was better without her. Of course, the way he said led him to realize that GR was Zero and, thus, had the exact effect of making him curious more about him. [summons needed] after he discovered that his personality construction was modified to prevent him from mentioning certain subjects of discussion (namely the acts and things related to them), Ghost Rider dove through cyberspace in an attempt to track their Work Down and hammer some answers. Ais hide from him and some discussed the possibility of making a mistake when choosing zero as their agent. Others suggested to wait it out – citing that the Ghostly Rider would soon be too busy to harass them. The prophecy came true, of course, as it was launched into a series of battles that fought against a Jeter (the man who killed him), a thrill-killing club that was using monstrous-looking constructs to hunt down former special-force types for sport, and a highly skilled cybernetic killer named Coda – which actually managed to explode GR into his Constitution elements. [summons needed] Shortly later, Ghost Rider reviewed to discover that Doom 2099 had managed to take control of the UNITED States. Having earlier made a deal with the Ghostworks tasks for accessing the agents (in exchange for letting them be), Doom sent his SHIELD agent from the city following the Android red down. GR hate preceded the president and presented with an offer to become federal Marshal for the Transverse City region. Though he was initially denied (unwanted to become part of the System he so despised), Doom triggered a series of commands on top and forced Zero to accept the position. [summons needed] Flush and his new power were found, Ghost Rider continued to ride on a number of pets and gang criminals, as well as the drug owner who helped him relocate the chemicals he needed to save Kylie early. This betrayal began a swipe under where all of Zero's former friends and associates begin to turn on it – see only another Oppressor rather than the Hero of Membership Ghost Rider thought itself to be. At the same time, he found himself despised by the unreal safety copies, who viewed him as a coated cannon to give them a bad name (and, likely, suffered some jealousy for the wide operational width he gave). [summons needed] Power Solid-Forms Olographic System Camouflage System Stealth Field Generator Nanite-assisted Total Body Regeratific Capacity Dual-setup chassis w/compact camouflage mode and bulky combat mode Variable-power yesterday-mounted Ability Advanced Ha Qualified cyclists (motorcycle and hover-bike) Superhuman strength level (cybernetic) Transport a customized Ford Velociraptor 900XL hoverbike/supergarged turbo rusters. Laser eye weapons can yield weapons. Left hand consist of a morifiable nanomer's limbs that can form a mono-molecular edge of a retractable, electrically-charged chain entitled A.50 caliber semi-automatic mengun and several grenades (standard SHIELD operational equipment) while Doom completed his take-on in America, the toll of rider's body rider rebuilt it, essentially from scratch. In the #2, #2 demise image (from Neil Gaiman's Sandman series) appears on the monitors of the D/Monix conference room where the board is discussing the appearance of Rider Ghost. Original penciler series Chris Bachalo was also pencil for Gaiman's death: The high cost of living mini-series and several issues of the comic sandman. In the same issue, other monitors in this and next panel show portions of other characters, including Todd McFarlane's The Spawn, 2099's of the Pinier and the X-Man Banshee.
